The perfect finish

With the evolution of the building and construction industry, Cedar Sales identified the need for pre-finished products and off-site coating services to achieve the perfect look with added ease, efficiencies and on-site cost savings.

Cedar Sales uses industrial coating machines to produce outstanding and consistent results that are difficult to replicate by using conventional on-site application methods.

Out-of-weather use

OUT OF DIRECT SUNLIGHT AND RAIN

SATIN

Enhance the inherent depth of character and colour of Western Red Cedar with a satin finish.

- A premium professional, commercial grade finish.
- Environmentally friendly with no VOCs [volatile organic compounds].
- UV resistant.
- Clear Satin and Pecan Satin available.

WASHES

- Maintenance-free finish.
- Internal and out-of-weather applications.
- Hemlock has even texture, giving a consistent finish.
- Consistent colouring.

SATIN WASHES

- The combination of striking colours and satin washes on Hemlock, are a designer's dream come true.

MATTE WASHES

- In-vogue colours and matte washes on Hemlock to help you reflect the sun, surf and beach.

External use

TIMBER USED OUTSIDE NEEDS EASY MAINTENANCE

PRE-PRIMED

Many architects use Western Red Cedar exclusively for painted applications because it stays flat and straight like no other, giving a perfect, consistent finish.

Cedar Sales offers a pre-priming service for external cladding, providing a high quality, external grade undercoat before it's delivered to site for installation and painting.

- Achieves clean, sharp lines and a long lasting professional look.
- Using Western Red Cedar for painted applications avoids any warping or twisting, or pulling of nails.

CUTEK®

Cutek® is a proven penetrating oil, with Colortone additives, for external timber products.

- Cedar Sales offers a two-coat process applied at the plant using Cutek® Clear. It is recommended that a pigmented coating is applied on-site for additional protection after installation.
- Easy to apply without the need to sand.
- Doesn't peel or crack.
- Works by penetration rather than by forming a film.
- Provides long-term weather protection, stabilises timber and repels moisture.
- See overleaf for Cutek® Colortone options.

RUSTIC GOLD

SELA BROWN

WALNUT

Note: If desired, Cutek® can be used to protect the timber and still allow the surface to go grey. To do this, simply use the 'Clear' Cutek® with no pre-tint. If you wish to maintain the colour, you must use a pre-tinted colour from the choices listed on the previous page. Please note that all external coatings, including Clear or Pre-tinted Cutek® will require periodic maintenance.

Important: In order for Cutek® to function properly the oil must be able to diffuse deeply into the timber. Any situation that would inhibit this free diffusion, such as the presence of any surface sealant, coating barrier or excess retained moisture in the timber, must be addressed before the application of this product.

Photographs, images and drawings used herein are for illustration purposes only. Colours, grades and finishes on actual products may vary. All timber products will vary from samples. Being a natural product, expect sheen, tonal and colour variation and natural features including knots, grains and grain impressions. We recommend viewing all products prior to installation. Cedar Sales' is unable to offer any specific performance warranties for its products because of the wide variation in applications possible. These variables include but are not limited to; situation, design and structure, aspect and differing exposure to the weather. For more details, visit cedarsales.com.au/terms-and-condition-of-trade.
